Empower Labs

Game Design Intern Job Description

Position   : Game Designer

Experience : (1-3 years)

Location   : Hyderabad

The Nitty Gritty

We are looking for a Game Design Intern to join us, who will collaborate on the game design and assist with providing a future strategy for title Delta-T. Most importantly, this individual will ensure that the game remains fun for the fans.

The Duties

- Pitch innovative game features that are designed to improve customer acquisition, engagement and/or monetization. Overall, they must be fun.

- Work with engineering and art teams to effectively implement new features and systems.

- Design and plan systems, features, mechanics and game content in addition to balancing game pacing and in-game economies to ensure and optimize long-term player retention and monetization.

- Provide clear feature documentation.

- Analyze data and player feedback to continually optimize the existing game experience.

The Essentials

- Solid understanding of F2P games, with preference given to game with multiplayer environments.

- Strong understanding of Augmented Reality and their design limitations.

- Preferred experience with feature design and documentation skills.

- Create and maintain detailed designs for all phases of development. Clearly communicate design intent to team.

- Contribute to design discussions and key design decisions.
